

mrtg treeview - Bug #2

Changing the list also resets the timespan

2008-04-12 22:03 - Hamish

Status:	New	Start date:	2008-04-12
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	0.5		
Description			
MRTG offers graphs of several different timespan's (daily/weekly/monthly/yearly) graphs which can be selected in the mrtg.cgi with a top header. When a new list is selected from the tree, the current timespan is lost and the daily graphs are selected again

Unsure if this is a bug or a feature. I am currently leaning towards calling it a bug
